<ul style="list-style-type: none"> <li>The Underlying Fund invests globally at least 70% of its total assets in the equity securities of smaller capitalisation companies. Currency exposure is flexibly managed.</li> <li>In order to achieve its investment objective and policy, the Underlying Fund will invest in a variety of investment strategies and instruments. In particular, the Underlying Fund will use quantitative (i.e. mathematical or statistical) models in order to achieve a systematic (i.e. rule based) approach to stock selection. This means that stocks will be selected based on their expected contribution to portfolio returns when risk and transaction cost forecasts are taken into account.</li> <li>The Underlying Fund may invest directly up to 20% of its total assets in the PRC by investing via the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong Stock Connect.</li> <li>The Underlying Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</li> </ul>	Refer to "Investment Objective, Policy and Strategy" and "Use of Derivatives and Securities Lending" of the Underlying Fund's Singapore Prospectus for further information on investment strategy of the sub-fund.
