KEY RISKS

WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

The value of the ILP sub-fund may rise or fall. The following key risk factors may cause you to lose some or all of your investment:

Please refer to the Underlying Fund's Luxembourg Prospectus, Book I - Appendix 3 for further information on the risks of the sub-fund.

Market and Credit Risks

You are exposed to market risks in the Russian region.

- Your investment may go up or down due to changing economic, political or market conditions that impact the prices of the shares or other securities that the Underlying Fund invests in.

Liquidity Risks

The ILP sub-fund is not listed on the Singapore Exchange and you can redeem only on Business Days through Singapore Life Ltd. In respect of Singapore investors, there is no secondary market for the ILP sub-fund.

Product-Specific Risks

You are exposed to extra-financial criteria investment risk

- An extra-financial approach may be implemented in a different way by management companies when setting investment management objectives for financial products, in particular in view of the absence of common or harmonized labels at European Level. This also means that it may be difficult to compare strategies integrating extra-financial criteria to the extent that the selection and weightings applied to select investments may be based on metrics that may share the same name but have different underlying meanings. In evaluating a security based on the extra-financial criteria, the Investment Manager may also use data sources provided by external extra-financial research providers. Given the evolving nature of the extra-financial field, these data sources may for the time being be incomplete, inaccurate unavailable, or updated. Applying responsible business conduct standards as well as extra-financial criteria in the investment process may lead to the exclusion of securities of certain issuers. Consequently, the sub-fund's financial performance may at times be better or worse than the performance of reliable funds that do not apply such standards. In addition, the proprietary methodologies used to take into account ESG non-financial criteria may be subject to reviews in the event of regulatory developments or updates that may lead, in accordance with the applicable regulations, to the increase or decrease of the classification of products, of the indicators used or of the minimum investment commitment levels set.

You are also exposed to emerging markets risk, equity risk, operational risk and custody risk, risks related to investments in some countries and small cap, specialised or restricted sectors risk.

Please refer to the Underlying Fund's Prospectus, Book I – Appendix 3 and Book II for further details on the product-specific risks of the sub-fund.
