Investment Strategy

<ul style="list-style-type: none"> • The Underlying Fund seeks a high level of current income and capital appreciation by investing primarily in high-yielding, sub investment grade securities of issuers that have their head office or who exercise a predominant part of their activity in Western, Central and Eastern Europe (including Russia). This region includes certain countries considered to be emerging markets. The type of debt securities in which the Underlying Fund will primarily invest will be subject to high risk and will not be required to meet a minimum rating standard. Most but not all will be rated for creditworthiness by an internationally recognised rating agency. • A minimum of 50% of the Underlying Fund’s net assets will be invested in securities deemed to maintain sustainable characteristics. • The Underlying Fund is actively managed. The Investment Manager will, when selecting investments for the Underlying Fund and for the purposes of monitoring risk, reference ICE BofA Global High Yield European Issuers Constrained (Level 4 20% Cap) Index (the "Index") as the Index constituents best represent the characteristics the Underlying Fund is seeking to gain exposure to. The Underlying Fund’s performance can be assessed against its Index. • The Investment Manager has a wide range of discretion relative to the Index. While the Underlying Fund will hold assets that are components of the Index, it may also invest in issuers, sectors, countries and security types that are not included in, and that have different weightings from, the Index in order to take advantage of investment opportunities. It is expected that over long time periods, the Underlying Fund’s performance will differ from the Index. However, over short time periods, the Underlying Fund’s performance may be close to the Index, depending on market conditions. • Shareholders’ attention is drawn to the fact that the Index is not an index which integrates environmental and social considerations. Instead, the Underlying Fund promotes environmental and social characteristics by adhering to Fidelity’s sustainable investing framework. • The Underlying Fund’s exposure to Distressed Securities is limited to 10% of its assets. • FDIs may be used to reduce risks or costs or to generate additional capital or income in order to meet the Underlying Fund’s investment objective. 	<p>Refer to the “Investment Objectives” section of the of the Underlying Fund’s Prospectus for further information on the investment strategy of the Sub-Fund.</p>
