<p><b>Investment Strategy</b></p>	
<ul style="list-style-type: none"> <li>The Manager adopts an active management approach that is focused on creating a truly diversified investment portfolio outcome for the Underlying Fund’s investors.</li> <li>Unlike traditional balanced funds that simply focus on tactically allocating between defensive and growth assets, depending on the risk profile of the Underlying Fund and the Manager’s relative view of such asset classes, the Manager recognises that between defensive assets and growth assets, there are a range of assets that can contribute to a combination of better returns and lower risk in a portfolio. These asset classes warrant consideration.</li> <li>Additionally, the Manager recognises that over time, traditional defensive and growth asset classes may behave in a similar fashion and therefore may not always provide investors with a diversified portfolio outcome. By considering a broad range of asset classes, sub-asset classes and investment styles, the Manager attempts to increase the probability of achieving the investment objective in a consistent manner, over the long term.</li> </ul>	<p>Refer to “Investment Objective, Focus and Approach” section of the Underlying Fund’s Prospectus for further information on the investment strategy of the Underlying Fund.</p>
