<p>Investment Strategy</p>	
<ul style="list-style-type: none"> We intend to achieve the investment objective of the Underlying Fund by investing in a diversified portfolio of Asian fixed income or debt securities, which primarily comprises of high yield fixed income or debt securities that may be non-investment grade and/or unrated. Notwithstanding the foregoing, the Underlying Fund may from time to time invest in Asian investment grade fixed income or debt securities if Asian high yield fixed income or debt securities are not available at acceptable prices or volume. Non-investment grade fixed income or debt securities would include those securities with a long term credit rating of below “BBB-” by Standard and Poor’s, “Baa3” by Moody’s Investors Service, “BBB-” by Fitch Inc, or their equivalent. The geographic regions in which the Sub-Fund will invest include but are not limited to Singapore, Malaysia, Thailand, Indonesia, Philippines, Hong Kong SAR, South Korea, Taiwan, China, Australia, New Zealand and Japan. The Underlying Fund will invest in a broad range of fixed income or debt securities which may or may not be listed and which may be denominated in any currency. The Underlying Fund will be actively managed with a focus on yield at an acceptable risk premium. Credit spread is the main source of incremental return. Our investment style is based on the credit fundamentals of the relevant company and the extent to which the pricing has been reflected in the credit in question. A long-term view is taken when assessing an investment opportunity. We recognize that Asian markets are subject to greater volatility than developed markets and may therefore require a greater level of trading. Our policy is to have the Underlying Fund fully invested save where there is overwhelming evidence to suggest that the markets are excessively overvalued. Prior to 28 March 2022, the Underlying Fund may use or invest in FDIs for the purposes of hedging, efficient portfolio management, optimising returns, or a combination of such purposes. With effect from 28 March 2022, the Underlying Fund may use or invest in FDIs for the purposes of hedging and efficient portfolio management. With effect from 28 March 2022, the Units of the Underlying Fund will be Excluded Investment Products and the Underlying Fund will not invest in any product or engage in any transaction which may cause the Units of the Underlying Fund not to be regarded as Excluded Investment Products. The Underlying Fund is actively managed with reference to its benchmark, J.P. Morgan Asia Credit Index (JACI) Non-Investment Grade Total Return Index, which is used for performance comparison purposes. The benchmark is neither used as a constraint on how the Underlying Fund’s portfolio is to be constructed nor set as a target for the Underlying Fund’s performance to beat. 	<p>Refer to Paragraphs 16.4, 17.4, 22 and 25.4 of the Underlying Fund’s Prospectus for further information on the investment strategy of the Sub-Fund.</p>
