**WHAT ARE YOU INVESTING IN?**

You are investing in an ILP sub-fund that feeds 100% into the Underlying Fund, a unit trust constituted in Singapore that aims to invest substantially (i.e. approximately two third of its assets) into the Schroder International Selection Fund Global Emerging Market Opportunities (“Underlying sub-fund”), whose investment objective is to aim to provide capital growth and income in excess of the MSCI Emerging Markets (Net TR) index after fees have been deducted over a three to five year period by investing in equity and equity related securities of companies in emerging market countries worldwide.

The Underlying Fund is one of the sub-funds in the Schroder International Selection Fund, an open-ended investment company incorporated in Luxembourg.

Refer to “Basic Information” and “Structure of the Trust”, sections of the Underlying Fund’s Prospectus and the “Investment objective, focus and approach” section of Appendix 4 in the Underlying Fund’s Prospectus for further information on features of sub-fund.

<sup>1</sup> For ILP sub-fund that feed 100% into an underlying CIS fund, some of the information provided below could be similar to the underlying CIS fund.

<sup>2</sup> In order for units in the ILP sub-fund to be classified as Excluded Investment Products, the investment objectives and investment focus of the ILP sub-fund, and investment approach of the manager have to be stated in the product summary:

- (a) to invest only in deposits or other Excluded Investment Products; and

The definition of “Excluded Investment Product” can be found in Annex 1 to the Notice on Recommendations on Investment Products [Notice No. FAA-N16] at <https://www.mas.gov.sg/regulation/notices/notice-faa-n16>.

\* 1 February 2011 is the launch date of the ILP sub-fund. Previously known as 7 October 2010, which was the Underlying Fund’s launch date.

### Product-Specific Risks

**You are exposed to emerging markets and frontier risk.**

- Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty and operational risk.

**You are exposed to financial derivatives risk.**

- The Underlying Fund may use financial derivatives. The use of futures, options, warrants, forwards, swaps or swap options involves increased risk. The Underlying Fund's ability to use such instruments successfully depends on the Manager's or Investment Manager's ability to accurately predict movements in stock prices, interest rates, currency exchange rates or other economic factors and the availability of liquid markets. If the Manager's or Investment Manager's predictions are wrong, or if the financial derivatives do not work as anticipated, the Underlying Fund could suffer greater losses than if the Underlying Fund had not used the financial derivatives.

**You are exposed to equity risk.**

- The Underlying Fund may invest in stocks and other equity securities and their derivatives which are subject to market risks that historically have resulted in greater price volatility than that experienced by bonds and other fixed income securities. When the price of the underlying equity exceeds the conversion price, the convertible instrument generally behaves more like an equity and will be more sensitive to changes in equity securities. When the price of the underlying equity is lower than the conversion price, the convertible instrument generally behaves more like a bond and will be more sensitive to changes in interest rates and in credit spreads.

**You are exposed to currency risk.**

- The assets and liabilities of the Underlying Fund may be denominated in currencies other than the Underlying Fund's base currency and the Underlying Fund may be affected by exchange control regulations or changes in the exchange rates between its base currency and such other currencies. There is the prospect of additional loss (or additional gain) to you which is greater than the usual risks of investment.

**You are exposed to counterparty risk.**

- The counterparty to a financial derivative or other contractual agreement or synthetic financial product could become unable to honour its commitments to the Underlying Fund, potentially creating a partial or total loss for the Underlying Fund.

**You are exposed to risks associated with investing through the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong Stock Connect.**

- The Underlying Fund may invest in China A-Shares directly via the Shanghai-Hong Kong Stock Connect and/or the Shenzhen-Hong Kong Stock Connect (as further described in section (A) of the Annex to the Underlying Fund's Prospectus).

**You are exposed to risks associated with investing in an underlying fund with environmental and/or social characteristics.**

- The Underlying Fund which has environmental and/or social characteristics (within the meaning of Article 8 of the SFDR) may have limited exposure to some companies, industries or sectors as a result and the Underlying Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager.
