Structure of ILP sub-funds

The ILP sub-funds are an open-ended feeder funds that invest 100% into the above sub-funds (the “Underlying Fund”) of Neuberger Berman Investment Funds plc which is an investment company with variable capital incorporated in Ireland as a public limited company under the laws of Ireland and authorised as a UCITS umbrella fund by the Central Bank of Ireland. Neuberger Berman Investment Funds plc is constituted as an umbrella fund with segregated liability between sub-funds.

The units in the ILP sub-funds are not classified as Excluded Investment Products.

Information on the Manager

Management Company of the Underlying Funds

Neuberger Berman Investment Funds plc (the “Company”) is an investment company with variable capital constituted as an umbrella fund with segregated liability between sub-funds under the laws of Ireland and is constituted outside of Singapore. The Company has appointed Neuberger Berman Singapore Pte. Limited (whose details appear in the Directory of this Singapore Prospectus) as its Singapore representative and agent for service of process in Singapore.

Investment Manager of the Underlying Funds

Neuberger Berman Europe Limited (the “Investment Manager”) was appointed by Neuberger Berman Investment Funds plc to provide investment management and advisory services to Neuberger Berman Investment Funds plc in respect of all sub-funds of Neuberger Berman Investment Funds plc. The Investment Manager is authorised and regulated by the FCA in the UK to conduct designated investment business and is registered as an Investment Adviser with the Securities and Exchange Commission in the United States. It was incorporated in the UK on 25 May 2005 as a private limited liability company and is a subsidiary of Neuberger Berman Group LLC, a management controlled company.

Pursuant to a Sub-Investment Management Agreement dated 1 January 2016 between the Investment Manager and Neuberger Berman Investment Advisers LLC, a Sub-Investment Management Agreement dated 10 October 2013, as amended, between the Investment Manager and Neuberger Berman Singapore Pte. Limited and a Sub-Investment Management Agreement dated 29 March 2019 between the Investment Manager and Neuberger Berman Asset Management Ireland Limited, the Investment Manager has appointed Neuberger Berman Investment Advisers LLC, Neuberger Berman Singapore Pte. Limited and Neuberger Berman Asset Management Ireland Limited as sub-investment managers (the “Sub-Investment Managers”) in respect of the Underlying Fund.

Neuberger Berman Investment Advisers LLC, Neuberger Berman Singapore Pte. Limited and Neuberger Berman Europe Limited are registered as Sub-Investment Manager with the Securities and Exchange Commission in the United States and are wholly-owned indirect subsidiaries of Neuberger Berman Group LLC. Neuberger Berman Singapore Pte. Limited is regulated by the Monetary Authority of Singapore. Neuberger Berman Asset Management Ireland Limited is authorised by the Central Bank.

Other Parties

The Custodian (which is the Depositary) of the Underlying Funds is Brown Brothers Harriman Trustee Services (Ireland) Limited.

The Singapore representative of the Underlying Funds is Neuberger Berman Singapore Pte. Limited.

Please refer to “Other Parties” in the Neuberger Berman Investment Funds plc Prospectus for details of other parties involved in the Underlying Funds.

Investment Objective, Focus & Approach

Underlying Fund	Investment Objectives, Focus & Approach
<ul style="list-style-type: none"> • Neuberger Berman Emerging Market Debt - Hard Currency Fund (USD) • Neuberger Berman Emerging Market Debt - Hard Currency Fund (SGD) 	<p>The Underlying Fund aims to achieve a target average return of 1-2% over the Benchmark (as specified in the “Benchmark” section below) before fees over a market cycle (typically 3 years) by investing primarily in Hard Currency-denominated debt issued in Emerging Market Countries.</p> <p>Investors should note that the target return is not guaranteed over a market cycle, a 12-month or any period and the Underlying Fund’s capital is at risk. Investors should also note that, over the course of a market cycle, there may be significant periods of time during which the performance of the Underlying Fund will deviate from the targeted return and the Underlying Fund may experience periods of negative return. There can be no guarantee that the Underlying Fund will ultimately achieve its investment objective.</p> <p>The Underlying Fund will invest primarily in debt securities and money market instruments issued by public or private issuers in Emerging Market Countries which are denominated in Hard Currency. For the purposes of the Underlying Fund, Hard Currency is defined as US Dollar, Euro, Sterling, Japanese Yen and Swiss Franc and investors should also note that public issuers include corporate issuers that are, either directly or indirectly, 100% government-owned.</p> <p>With the exception of permitted investments in transferable securities and money market instruments which are unlisted, all securities invested in by the Underlying Fund will be listed, dealt or traded on Recognised Markets globally, without any particular focus on any one industrial sector or region.</p> <p>Please note that, as described below in the “Risk” section, investments in securities issued by companies located in, and governments and government agencies of, Emerging Market Countries may involve additional risk, relative to investment in more developed economies.</p> <p>Under normal market conditions, the Manager and the Sub-Investment Manager will invest at least two thirds of the Underlying Fund’s Net Asset Value in debt securities, money market instruments and FDI with the intention of gaining exposure to the performance of interest rates and/or currencies of Emerging Market Countries. Up to a maximum of one third of the Underlying Fund’s Net Asset Value may then be invested in money market instruments and debt securities issued by public or private issuers in OECD countries and/ or debt securities and money market instruments issued by public or private issuers in Emerging Market Countries which are denominated in the Hard Currency (defined for the purpose of this Underlying Fund as US Dollar, Euro, Sterling, Japanese Yen and Swiss Franc).</p>

	<p>On an ancillary basis, the Underlying Fund may hold equity securities issued by public or private issuers in Emerging Market Countries, such as shares, as a result of the conversion of convertible debt securities or restructuring of debt securities.</p> <p>In addition, the Manager and the Sub-Investment Manager may use futures, options, warrants, and/or swaps (including credit default swaps and swaptions) on debt securities or money market instruments, indices and interest rates to hedge investments in such instruments. Investors should note that it may not be possible or practical to hedge the Underlying Fund's exposures to such instruments perfectly and that, where it deems it appropriate, the Manager and the Sub-Investment Manager may take hedging positions in respect of other instruments which it considers to be suitable proxies for the Underlying Fund's investments.</p> <p>The Manager and the Sub-Investment Manager implement a systematic and disciplined framework for analysing sovereign and corporate local currency and Hard Currency debt securities. Decisions on how to allocate the Underlying Fund's assets between sovereign and corporate and local currency and Hard Currency Emerging Market Country debt securities, money market instruments and FDI are dependent on the Manager's and the Sub-Investment Manager's outlook on such securities. This outlook focuses on the global market environment, the economic environment of the relevant Emerging Market Countries, the attractiveness of the valuations available in the asset classes and their liquidity. From this outlook, the Manager and the Sub-Investment Manager determine the amount of risk that they want the Underlying Fund to take and allocate across security types accordingly.</p> <p>The Manager and the Sub-Investment Manager believe their global presence provides a local perspective on macro as well as micro events which feeds into the respective team's overall research. The Manager and the Sub-Investment Manager will seek to anticipate yield, spread and currency movements in response to changes in:</p> <ul style="list-style-type: none"> • Economic conditions; • Region, country and sector fundamentals; and • Issuer specific financial performance and other issuer specific factors. <p>The Manager and the Sub-Investment Manager will conduct fundamental analysis on the issuers that they track in order to identify undervalued and overvalued securities and exploit investment opportunities. The fundamental analysis used for the selection of governments or government-related issuers incorporates quantitative macroeconomic data and qualitative aspects such as political stability and structural reforms.</p>
--	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

	<p>The fundamental analysis used for the selection of corporate issuers includes quantitative factors aimed at assessing the issuer's financial performance such as revenue/EBITDA ("earnings before interest, tax, depreciation and amortisation") growth, cash flow growth and capital expenditures. Qualitative factors aim to complement the evaluation of corporate credit worthiness by including such factors as corporate governance, quality of earnings and debt structure.</p> <p>The Underlying Fund may invest up to 20% of its Net Asset Value in PRC onshore bonds via Bond Connect.</p> <p>Under normal market conditions, the Manager anticipates that the Underlying Fund's average interest duration will be within the range of +2 years and -2 years compared to the Benchmark.</p> <p>The Underlying Fund may have or may be expected to have medium to high volatility due to its investment policies or Underlying Fund management techniques.</p> <p>The Underlying Fund is actively managed and does not intend to track the Benchmark which is included here for performance comparison purposes and because the Underlying Fund's investment policy restricts the extent to which the Underlying Fund's holdings may deviate from the Benchmark, as described above and in the "Investment Restrictions" section. This deviation may be significant.</p>

Distribution Policy

Please refer to the section on "Distribution of Dividends" (if applicable) in the relevant Investment Linked Product (ILP) – Product Summary for further details.

Risks

The ILP sub-fund is not listed on the Singapore Exchange and you can redeem only on Business Days through Singapore Life Ltd. In respect of Singapore investors, there is no secondary market for the ILP sub-fund.

Please refer to the section on "Investment Risks" in the Neuberger Berman Investment Funds plc Prospectus for a description of the risk factors associated with investing in the Underlying Fund. The risks include:

Market and Credit Risks

Fixed Income Securities and Downgrade Risk – Fixed income securities are subject to credit risk and price volatility. Fixed income securities are also exposed to the risk of being downgraded, which can cause a significant drop in the value of the Portfolio. The Manager or Sub-Investment Manager may or may not be able to dispose of the debt instruments that are being downgraded.

Lower Rated Securities Risk – The Portfolio may invest in lower rated or unrated (i.e. non-investment grade or high yield) securities, which are more likely to react to developments affecting market and credit risk than are more highly rated securities. The Portfolio may therefore find it more difficult to sell such high yield securities or may be able to sell these securities only at prices lower than if such securities were widely traded. The Portfolio may experience difficulty in valuing certain securities at certain times.

Credit Risk – The Portfolio may invest in corporate fixed income securities. Corporate issuers of such fixed income securities may fail to meet their interest repayments, or repay debt, which may result in the Portfolio suffering temporary or permanent losses.

Sovereign Debt Risk – The Portfolio may invest in government/sovereign fixed income securities. The Portfolio will be exposed to direct or indirect consequences of political, social and economic changes in various countries by investing in sovereign debts.

Emerging Market Economies Risk and Emerging Market Debt Securities Risk – Investing in emerging markets may involve heightened risks (some of which could be significant) such as greater social, economic and political uncertainty, and periods of extreme volatility. Debt securities of Emerging Market Countries may be subject to greater risk of loss of principal and interest and liquidity risk, and be exposed to fluctuations in yields or prices, than debt securities issued by obligors in developed countries.

Risks Associated with Investment in the China Interbank Bond Market through Bond Connect - investing through Bond Connect in eligible bonds traded on the China Interbank Bond Market may expose to other risks including but not limited to suspension risk,

operational risk, differences in trading day, regulatory risk and taxation risk, which may adversely affect the portfolio's ability to access PRC bond market to achieve his investment objectives.

Currency Risk – The base currency value of the investment of the Portfolio designated in another currency may rise and fall due to exchange rate fluctuations in respect of the relevant currencies. The currency exchange rates of Emerging Market Countries tend to be more volatile than those of more developed countries. As the base currency of the Portfolio is not in Singapore dollars, Singapore investors may be exposed to an additional currency risk.

Currency Hedging Risk – Currency hedging instruments may involve the risk of a default by a counterparty.

Liquidity Risk

The Underlying Fund is not listed in Singapore and you can redeem only on Dealing Days – There is no secondary market for the Underlying Fund. Your right to redeem may be suspended or deferred under certain circumstances.

Product-Specific Risks

Risks relating to the use of FDI – FDIs may be subject to various types of risks, including market risk, liquidity risk, counterparty credit risk, legal risk and operations risk. In addition, FDIs can involve significant economic leverage and may, in some cases, involve high risk of significant loss. The use of FDIs may lead to risk of loss of capital or increase the volatility of a Portfolio's NAV.

Risks relating to dividend payment – Dividends paid out of capital amount to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment which may result in an immediate decrease in the NAV of the relevant shares. An investment in high yield securities does not necessarily imply high dividend distribution for all share classes.

The above should not be considered to be an exhaustive list of the risks which you should consider before investing into the Underlying Fund. You should be aware that an investment in the Underlying Fund may be exposed to other risks of an exceptional nature from time to time. Please refer to the Underlying Fund's Prospectus for further details.

Fees and Charges

In addition to the fees and charges shown in the Product Summary, the following fees are also payable through deduction from the asset value of the Underlying Fund. The Annual Management Charge (AMC) of the Underlying Fund is:

Underlying Funds	AMC
Neuberger Berman Emerging Market Debt - Hard Currency Fund A Acc USD	1.40%

Expense Ratio and Turnover Ratio

Underlying Funds	Expense Ratio	Turnover Ratio
Neuberger Berman Emerging Market Debt - Hard Currency Fund A Acc USD	1.49%	23.85%
Neuberger Berman Emerging Market Debt - Hard Currency Fund SGD A Hedged (mth) Dis	1.49%	23.85%

The expense ratio stated in the table above is for the period ending 31 December 2022.

The turnover ratio stated in the table above is for the period ending 31 December 2022.

The expense ratio is calculated in accordance with the Investment Management Association of Singapore guidelines on the disclosure of expense ratios. The expense ratio does not include (where applicable) charges for insurance coverage, brokerage and other transaction costs, performance fee, foreign exchange gains or losses, front or back-end loads arising from the purchase or sale of collective investment schemes and tax deducted at source or arising out of income received.

Soft Dollar Commissions or Arrangements

We do not receive any soft dollar commissions in respect of the Underlying Fund(s).

Conflicts of Interest

We do not have any conflict of interests which may exist or arise in relation to the Underlying Fund(s) and its management.

Suspension of dealings

We reserve the right to suspend immediately any issue, withdrawal, exchange or other dealing in relation to the ILP sub-fund(s) if the fund manager, or any government or regulatory body of competent jurisdiction, or we (at our reasonable discretion) decide to suspend the issue, withdrawal, exchange or other dealing in the units or shares of the ILP sub-fund(s).

Reports

The financial year-end of the ILP sub-fund is 30 June. Singapore Life Ltd. will make available semi-annual report and annual audited report of the ILP sub-fund within 2 months and 3 months respectively from the relevant reporting periods.

In addition, Singapore Life Ltd. will make available financial reports of the Underlying Fund as they become available from the Investment Manager. Policyholders can access these reports via the website at www.singlife.com

Specialised ILP sub-fund

The ILP sub-fund is not a specialised sub-fund as set out in MAS Notice 307 on Investment-Linked Policies issued by the Monetary Authority of Singapore.
