<ul style="list-style-type: none"> The Underlying Fund’s total assets will be invested in accordance with the ESG Policy, as outlined below and further described in the Singapore Prospectus: The Underlying Fund will apply the BlackRock EMEA Baseline Screens. The Investment Adviser (“IA”) intends to limit direct investment in securities of issuers involved the production, distribution or licensing of alcoholic products; ownership or operation of gambling-related activities or facilities; production, supply and mining activities related to nuclear power and production of adult entertainment materials. The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received. The IA will exclude any issuer with a MSCI ESG rating below BBB. The remaining companies are then rated by the IA based on their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company’s financials. To undertake this analysis, the IA may use data provided by external ESG Providers, proprietary models, etc. The Underlying Fund may gain limited exposure (through e.g. derivatives) to issuers with exposures that do not meet the ESG criteria described above. The IA also intends to limit investments in companies within the Global Industry Classification Standard (GICS) Oil & Gas Exploration & Production sector and companies within the Global Industry Classification Standard (GICS) Integrated Oil & Gas sector to below 5% of its total assets. The Underlying Fund adopts a “best in class” approach to sustainable investing, i.e. the Underlying Fund selects the best issuers (from an ESG perspective) for each relevant sector of activities. More than 90% of the issuers the Underlying Fund invests in are ESG rated or have been analysed for ESG purposes. The Underlying Fund has a flexible approach to asset allocation. The Underlying Fund may invest in securities denominated in currencies other than the reference currency (Euro). Currency exposure is flexibly managed. The Underlying Fund may invest up to 20% in aggregate of its total assets in PRC via the Stock Connect, Foreign Access Regime and/or Bond Connect. The Underlying Fund may invest up to 20% of its total assets in ABS and MBS. The Underlying Fund’s exposure to contingent convertible bonds is limited to 20% of total assets. The Underlying Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. The Underlying Fund may use total return swaps and contracts for difference that have equity or fixed income transferable securities and equity or fixed income related securities as underlying assets.
