<p>Investment Strategy</p>	
<ul style="list-style-type: none"> • The Underlying Fund aims to achieve long-term capital growth from a portfolio primarily made up of equity securities issued by companies that are listed in, incorporated or have their domicile in, or exercise a majority of their activity in Asia excluding Japan. • The Underlying Fund is part of the Fidelity Sustainable Family of Funds and adopts a sustainable focused strategy under which a minimum of 90% of the Underlying Fund’s net assets will be analysed as to whether they maintain sustainable characteristics and a minimum of 70% of the Underlying Fund’s net assets will be invested in securities deemed to maintain sustainable characteristics. The average ESG rating of the Underlying Fund will exceed the average ESG rating of the Underlying Fund’s investment universe, as represented by the Index (for the purpose of this calculation) after the exclusion of 20% of the assets with the lowest ESG ratings. • In addition, the Investment Manager will exclude investments in issuers having exposure to coal fired electric utilities and crude palm oil. • The largest ten securities held in the Underlying Fund’s portfolio may account for 50% or more of the Underlying Fund’s Net Asset Value, resulting in a reasonably concentrated portfolio. • The Underlying Fund may invest its net assets directly in China A and B Shares. • The Underlying Fund is actively managed. The Investment Manager will, for the purposes of monitoring risk, reference MSCI AC Asia ex Japan Index (the "Index") as the Index constituents are representative of the type of companies the Underlying Fund invests in. The Underlying Fund’s performance can be assessed against its Index. • The Investment Manager has a wide range of discretion relative to the Index. While the Underlying Fund will hold assets that are components of the Index, it may also invest in companies, countries or sectors that are not included in, and that have different weightings from, the Index in order to take advantage of investment opportunities. It is expected that over long time periods, the Underlying Fund’s performance will differ from the Index. However, over short time periods, the Underlying Fund’s performance may be close to the Index, depending on market conditions. • Shareholders’ attention is drawn to the fact that the Index is not an index which integrates environmental and social considerations. Instead, the Underlying Fund promotes environmental and social characteristics by adhering to Fidelity’s sustainable family framework. • FDIs may be used to reduce risks or costs or to generate additional capital or income in order to meet the Underlying Fund’s investment objective. 	<p>Refer to “ Investment Objective” of the Underlying Fund’s Prospectus for further information on investment strategy</p>
<p>Parties Involved</p>
