KEY FEATURES OF THE SUB-FUND

WHAT ARE YOU INVESTING IN?

- You are investing in a ILP Sub-Fund that feeds 100% into an Underlying Fund, a unit trust constituted in Singapore that aims to provide regular distributions and long term growth from high dividend yielding equity investments focused in the Asia Pacific region (excluding Japan).

Refer to Appendix 6 of the Underlying Fund's Prospectus for further information on features of the product.

¹ For ILP Sub-Funds that feed 100% into an underlying CIS fund, some of the information provided below could be similar to the underlying CIS fund.

² In order for units in the ILP Sub-Fund to be classified as Excluded Investment Products, the investment objectives and investment focus of the ILP Sub-Fund, and investment approach of the manager have to be stated in the product summary:

(a) to invest only in deposits or other Excluded Investment Products; and

(b) not to engage in securities lending or repurchase transactions for the ILP Sub-Fund.

The definition of "Excluded Investment Product" can be found in Annex 1 to the Notice on Recommendations on Investment Products [Notice No. FAA-N16] at <https://www.mas.gov.sg/regulation/notices/notice-faa-n16>

<ul style="list-style-type: none"> Dividends paid out from the Underlying Fund will be allocated to You by allocating additional Units of the relevant distribution class Fund to the Policy. Units of the relevant ILP Sub-Fund will be allocated by the reinvestment of the dividends, as and when paid by that Underlying Fund, into the same Underlying Fund at the Unit Price. The additional Units will be allocated to Your Policy. 	
Investment Strategy	
<ul style="list-style-type: none"> The Underlying Fund will invest all or substantially all of its assets in FSSA Asian Equity Plus Fund (the “Underlying Sub-Fund”) an Underlying Sub-Fund under the Dublin registered umbrella fund known as First Sentier Investors Global Umbrella Fund plc. The Underlying Sub-Fund invests primarily (at least 70% of its net asset value) in equity securities or equity-related securities of companies that are listed, or have their registered offices in, or conduct a majority of their economic activity in the Asia Pacific region (excluding Japan). Such companies will be selected on the basis of their potential dividend growth and long term capital appreciation. The Underlying Fund and the Underlying Sub-Fund may use financial derivative instruments for the purposes of hedging or for efficient portfolio management. 	<p>Refer to Appendix 4 of the Underlying Fund’s Prospectus for further information on the investment strategy of the product.</p>
Parties Involved	
<p>WHO ARE YOU INVESTING WITH?</p> <ul style="list-style-type: none"> The Underlying Fund is a Sub-fund of the Singapore constituted umbrella fund First Sentier Investors Global Growth Funds (the “Scheme”). The Manager of the Underlying Fund is First Sentier Investors (Singapore). The Trustee of the Underlying Fund is HSBC Institutional Trust Services (Singapore) Limited and the Custodian of the Underlying Fund is The Hongkong and Shanghai Banking Corporation Limited. 	<p>Refer to “Management”, “The Trustee and the Custodian” and “Other Parties” sections in Paragraphs 2, 3 and 4 of the Underlying Fund’s Prospectus for further information on the role and responsibilities of these entities and what happens if they become insolvent.</p>
KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</p> <p>The value of the ILP Sub-Fund may rise or fall. The following key risk factors may cause you to lose some or all of your investment:</p>	<p>Refer to “RISK FACTORS” of the Underlying Fund’s Singapore Prospectus for further information.</p>
Market and Credit Risks	
<p>You are exposed to market risk in the Asia Pacific (excluding Japan) – certain situations may have a negative effect on the price of shares within a particular market. These may include regulatory changes, political changes, economic changes, technological changes and changes in the social environment.</p> <p>You are also exposed to currency risk.</p>	
Liquidity Risks	
<p>The ILP Sub-Fund is not listed on the Singapore Exchange and you can redeem only on Business Days through Singapore Life Ltd. In respect of Singapore investors, there is no secondary market for the ILP Sub-Fund.</p>	
Product-Specific Risks	
<p>You are exposed to investment risk – investment in the Underlying Fund involves risk and you may not get back the full amount you invested. Past performance is no guarantee of future performance.</p>	

You are exposed to emerging market risk – investing in emerging markets may involve a greater risk than investing in developed markets.

You are exposed to single country/specific region risk – the value of the Underlying Fund may be more volatile than a fund having a more diversified portfolio of investments covering multiple countries.

You may be exposed to risk of distributions out of capital – to the extent possible, distributions will be made from dividends received and capital gains realised for the Underlying Fund. However, if there is a deficit, the Manager may (although it is not the Manager’s current intention to do so) sell investments of the Underlying Fund to fund distributions which will erode the capital of the Underlying Fund and reduce the net asset value of its units.

You are exposed to small capitalisation/mid-capitalisation companies risk – securities in small-capitalisation/mid-capitalisation companies may have lower liquidity and their prices are more volatile to adverse economic developments than those of larger capitalisation companies in general.

You are exposed to single sector risk – the value of the Underlying Fund may be more volatile than a fund having a more diversified portfolio of investments.

You are exposed to charges against capital risk – Fees and expenses are charged against the capital of the Underlying Fund (or its Underlying Sub-Fund). Deducting expenses from capital reduces the potential for capital growth and on any redemption. Unitholders may not receive back the full amount invested.

You are also exposed to China market risk, RMB currency and conversion risk, risks associated with the ChiNext market and/or the Science and Technology Innovation Board (STAR Board), equity linked notes risk, risks of investing in China A Shares and other eligible PRC securities and futures via QFII/RQFII, concentration risk and risks specific to investment in eligible China A Shares via the Stock Connects.

The Underlying Sub-Fund will be subject to risks associated with its investment into other collective investment schemes.
