KEY RISKS

The following key risk factors may cause you to lose some or all of your investment:	Refer to “Risk Descriptions” and “Sub-Fund Descriptions – Europe Dynamic Fund” of the Underlying Fund’s Prospectus for further information on risks.
Market and Credit Risks	
You may be exposed to Market Risks <ul style="list-style-type: none"> Concentration – When an Underlying Fund invests in a limited number of securities, issuers, industries, sectors or within a limited geographical area, it is likely to be more volatile and risky as its performance will be more strongly affected by political, economic, environmental or market conditions within that area or economic sector. Equities – The value of equity securities may go down as well as up in response to the performance of individual companies and general market conditions sometimes rapidly or unpredictably. You may be exposed to Currency Risks <ul style="list-style-type: none"> Currency – Movements in currency exchange rates can adversely affect the return of your investment. Investing in a share class not denominated in SGD will expose you to additional currency risks. Hedging – Any measures taken to offset specific risks could work imperfectly. Hedging may be used to mitigate currency, duration, market or credit risk. Hedging involves costs, which reduce investment performance. 	
Liquidity Risks	
The ILP sub-fund is not listed on the Singapore Exchange and you can redeem only on Business Days through Singapore Life Ltd. In respect of Singapore investors, there is no secondary market for the ILP sub-fund.	
Product-Specific Risks	
You may be exposed to Derivatives Risk <ul style="list-style-type: none"> The Underlying Fund may, within its prescribed limits, invest in derivatives for hedging and Efficient Portfolio Management purposes. The value of derivatives can be volatile because a small movement in the value of the underlying asset can cause a large movement in the value of the derivative, resulting in losses in excess of the amount invested by the Underlying Fund. 	

<p>You may be exposed to Securities Lending Risks</p> <ul style="list-style-type: none"> The use of securities lending exposes the Underlying Fund to counterparty risk and liquidity risk.
