Parties Involved	
<p>WHO ARE YOU INVESTING WITH?</p> <ul style="list-style-type: none"> • The Managers are Artemis Fund Managers Limited. • The Investment Managers are Artemis Investment Management LLP. • The Custodian (which is the Depositary) is The Northern Trust Company, London Branch. 	<p>Refer to “The Manager” and “Management and administration” of the Underlying Fund’s Prospectus for further information on role and responsibilities of these entities and what happens if they become insolvent.</p>
KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</p> <p>The value of the ILP sub-fund may rise or fall. The following key risk factors may cause you to lose some or all of your investment:</p> <p>Market volatility risk The value of the Underlying Fund and any income from it can fall or rise because of movements in stock markets, currencies and interest rates, each of which can move irrationally and be affected unpredictably by diverse factors, including political and economic events.</p> <p>Currency risk The Underlying Fund’s assets may be priced in currencies other than the Fund base currency. Changes in currency exchange rates can therefore affect the Underlying Fund’s value.</p> <p>Income risk The payment of income and its level is not guaranteed.</p> <p>Emerging markets risk Compared to more established economies, investments in emerging markets may be subject to greater volatility due to differences in generally accepted accounting principles, less governed standards or from economic or political instability. Under certain market conditions assets may be difficult to sell.</p> <p>Charges from capital risk Where charges are taken wholly or partly out of the Underlying Fund’s capital, distributable income may be increased at the expense of capital, which may constrain or erode capital growth.</p>	<p>Refer to “Risk Warnings” of the Underlying Fund’s Prospectus and Factsheet for further information on risks of sub-fund.</p>
Market and Credit Risks	
<p>You may be exposed to the market risks in the global market place</p> <ul style="list-style-type: none"> • Your investments may go up or down due to changing economic, political or market conditions that impact the share price of the companies that the Underlying Fund invests in. <p>You may have exposed greater exposure to market risks as this is an equity invested sub-fund</p>	

<ul style="list-style-type: none"> Historically, equities have greater volatility than bonds and other fixed income securities. The Underlying Fund's valuation and the price at which you can exit may correspondingly fluctuate more strongly on a day-to-day basis compared to funds investing in bonds and other fixed income securities. <p>You may be exposed to company-specific risk</p> <ul style="list-style-type: none"> The price development of the equities securities held by the Underlying Fund is also dependent on company specific factors, i.e. the issuer's business situation. If the company-specific factors deteriorate, the price of the specific security may drop significantly and enduringly, possibly even without regard to an otherwise generally positive stock market trend. <p>You are exposed to exchange risk</p> <ul style="list-style-type: none"> The Underlying Fund may hold assets denominated in currencies other than the base currency of the Underlying Fund (i.e. GBP) or the reference currency of the relevant Class. Fluctuations in the exchange rates between the base currency of the Underlying Fund or the reference currency of the Units and such other currencies may have an impact on the income and value of the Underlying Fund. The Investment Manager may use currency forwards, futures, options and swap agreements to reduce the currency deviations of the portfolio of the Underlying Fund. The base currency of the Underlying Fund is the GBP and not SGD. The reference currency of the Units you invest in may not be the SGD. Unless otherwise indicated, the Investment Manager does not intend to hedge the currency risk of the base currency or reference currency against the SGD. If your reference currency is the SGD, you may therefore be exposed to this currency risk. 					
Liquidity Risks					
<p>The ILP sub-fund is not listed on the Singapore Exchange and you can redeem only on Business Days through Singapore Life Ltd. In respect of Singapore investors, there is no secondary market for the ILP sub-fund.</p>					
Product-Specific Risks					
<p>You may be exposed to derivatives risks</p> <ul style="list-style-type: none"> The Investment Manager may use derivative instruments, including options, futures, warrants, forwards, swaps or swap options, from time to time in managing the investments of the Underlying Fund. The usage of derivatives may negatively impact the value of the Underlying Fund and the Underlying Fund may suffer greater losses than if the Underlying Fund had not used derivatives. An Underlying Fund's use of derivative techniques may not always be an effective means of, and sometimes could be counterproductive to, following the Underlying Fund's investment objective. <p>You may be exposed to counterparty risk</p> <ul style="list-style-type: none"> The Underlying Fund may enter into transactions on over-the-counter markets, which will expose the Underlying Fund to the credit of its counterparty and its ability to satisfy the terms of such contracts. In the event of a bankruptcy or insolvency of a counterparty, the Underlying Fund could experience delays in liquidating the position and significant losses.
