WHAT ARE YOU INVESTING IN?

- You are investing in an ILP Sub-Fund that feeds 100% into the Underlying Fund, which is a Singapore-authorized unit trust, which aims to provide capital growth by investing in the Underlying Fund, which in turn invests in a portfolio of Chinese equities.

Refer to “Structure of the Sub-Funds” and “Investment Objectives and Focus of the Sub-Funds” in section 7 and 9 of the Underlying Fund’s Prospectus for further information on features of Sub-Fund.

Investment Strategy

- The Underlying Fund will invest all or substantially all of its assets in the Aberdeen Standard SICAV I – All China Sustainable Equity Fund. This Underlying Fund invests at least 90% of its assets in equities and equity-related securities of companies listed, incorporated or domiciled in China or companies that derive a significant proportion of their revenues or profits from Chinese operations or have a significant proportion of their assets there. The Underlying Fund may invest up to 100% of its net assets in Mainland China equity and equity-related securities through the Shanghai-Hong Kong and Shenzhen-Hong Kong Stock Connect programme or by any other available means, a 30% limit applies to QFI regime.
- The Underlying Fund is actively managed.
- The Underlying Fund aims to outperform the MSCI China All Shares Index (USD) benchmark before charges. The benchmark is also used as a reference point for Underlying Fund construction and as a basis for setting risk constraints, but does not incorporate any sustainable criteria.
- In order to achieve its objective, the Underlying Fund will take positions whose weightings diverge from the benchmark and may invest in securities which are not included in the benchmark. The investments of the Underlying Fund may deviate significantly from the components of and their respective weightings in the benchmark. Due to the active and sustainable nature of the management process, the Underlying Fund’s performance profile may deviate significantly from that of the benchmark.
- The Underlying Fund promotes environmental or social characteristics but does not have a sustainable investment objective. Investment in all equity and equity-related securities will follow abrdrn’s “All China Sustainable Equity Investment Approach”. Through the application of this approach the Underlying Fund targets an ESG rating that is equal to or better, and a meaningfully lower carbon intensity, than the benchmark.
- This approach utilises abrdrn’s equity investment process, which enables portfolio managers to qualitatively identify and focus investment in sustainable leaders and improvers. Additionally, abrdrn applies a set of company exclusions which are related to the United Nations Global Compact, Norges Bank Investment Management (NBIM), Weapons, Tobacco, Gambling, Thermal Coal, Oil & Gas and Electricity Generation.
- The Sustainable Equity Investment Approach reduces the benchmark investable universe by a minimum of 20%.
- The Underlying Fund may utilise financial derivative instruments for hedging and/or investment purposes, or to manage foreign exchange risks, subject to the conditions and within the limits laid down by applicable laws and regulations. The use of derivatives for hedging and/or investment purposes is expected to be very limited, mainly in those cases where there are significant inflows into the Underlying Fund so

Refer to “Investment Objectives and Focus of the Sub-Funds” and “Investment strategy/policy” in Section 9 and 11 of the Underlying Fund’s Prospectus for further information on investment strategy of the Sub-Fund.
