### Product-Specific Risks

**You are exposed to counterparty and collateral risk**

A counterparty could be unwilling or unable to meet its obligations to the fund. The value of collateral might not cover the full value of a transaction, or any fees or returns owed to the Underlying Fund.

**You are exposed to currency risk.**

Any changes in currency exchange rates could significantly reduce investment gains or income, or increase investment losses.

The value of derivatives can be volatile. Small movements in an underlying asset's value can create large changes in the derivative's value and expose the Underlying Fund to losses that could be greater than the cost of the derivative itself.

**You are exposed to hedging risk.**

Hedging may not work as intended and involves costs, which reduce investment performance.

**You are exposed to investment fund risk.**

Investing in the Underlying Fund involves certain risks an investor would not face if investing in markets directly, such as large outflows, valuation error and investment limitations.

**You are exposed to operational risk.**

The Underlying Fund could suffer losses due to errors, service disruptions or other failures, fraud, corruption, cyber crime, instability, terrorism or other irregular events.

**You are exposed to sustainable investing risk.**

The Underlying Fund may underperform the market or other funds that do not apply sustainability criteria.

**You are exposed to Volatility Risk.**

The Underlying Fund's NAV has potential for high volatility due to its investment policy or portfolio management techniques.
